

Custom AI agents and automation, built and run inside real operations.

AI STRATEGY · ARCHITECTURE · AGENTS & AUTOMATION · DOCUMENT INTELLIGENCE · MANAGED AI OPERATIONS

COMPANY OVERVIEW

Galang AI is a multi-award-winning, SBA-certified EDWOSB and Virginia SWaM AI engineering firm in Loudoun County, Virginia. We design, build and run custom AI agents, automation and document intelligence for a Department of War declassification program, Loudoun County's small-business program and companies in life sciences and digital health.

We pair Top Secret cleared key personnel with partner status in the OpenAI, AWS, Google Cloud and Microsoft programs, and we run our own company on AI agents every day. Nothing we build is off the shelf: each system fits how the client already works, we host and maintain it, and the client owns the code. In 2026 Virginia recognized Galang with SWaMmy Honors and the InternshipsVA Innovative Employer Award.

CORE COMPETENCIES

01

AI Strategy & Enablement
Hands-on training in AI best practices: where AI fits, where work should stay human, usage policies and adoption plans that stick.

02

Operations Audit & Automation Roadmaps
Workflow and systems assessments that find the highest-value automation, with a costed, phased roadmap and expected return.

03

AI Architecture & Advisory
Proof-of-concept and target-state architecture, model and OCR selection and evaluation plans aligned with NIST AI RMF and OMB M-25-21/M-25-22.

04

Agents & Workflow Automation
Custom agents, multi-agent workflows, tool integrations (MCP), CRM and dashboard integrations, and approval gates.

05

Document Intelligence & RAG
OCR pipelines, chunking, vector and graph retrieval, cited answers and human review queues.

06

AI Governance & Security
Sensitive-data guardrails before inference, audit trails, role-based access, reviewer sign-off and CMMC Level 1 practices.

07

Managed & Private AI Operations
Hosting, monitoring, evaluation and continuous improvement, including customer-controlled and self-hosted deployments.

08

AI Media & Content Systems
AI-powered content pipelines with human review, websites, and search and AI-answer visibility.

HOW WE WORK

1

Audit
Interview leaders and front-line staff and map how work really moves.

2

Roadmap
Cost, expected return and timeline for each phase.

3

Build
The first workflow, inside the tools the team already uses.

4

Run & expand
We host and improve it. No lock-in: clients own the code.

INDUSTRIES WE SERVE

Federal & defense

Local government & economic development

Life sciences & public health

Healthcare & digital health

Government contractors

Automotive & salvage

Community associations

Consumer products

Professional & home services

Past performance and experience

FEDERAL & DEFENSE

Department of War · Declassification mission support

Subcontract via Lumik LLC

Galang leads the AI architecture for an AI-enabled declassification platform. Documents flow through OCR and semantic search into LLM-assisted review, and the result appears in the reviewer's screen for a human decision. Delivered the proof-of-concept design, the target cloud architecture, the evaluation approach and the roadmap.

Lumik LLC · Federal IT contractor

Prime contract

Suru, a Slack-native executive assistant in daily use for inbox triage, calendar and CRM work with approval gates. A meeting-minutes workflow for federal program work that turns approved recordings into reviewed minutes, decisions, owners and due dates.

Federal tax agency · AI compliance platform

Key personnel experience · Sky Solutions

Led the design and delivery of an AI compliance platform in use by the program's review team: citation-backed research over policy, a guardrail that blocks sensitive identifiers before any model call, a reviewer-gated control-workbook generator, a case tracker, MFA, role-based access and audit trails.

LOUDOUN COUNTY & NORTHERN VIRGINIA

Loudoun County Economic Development · Launch Loudoun Technical Services Program

Approved provider · County-funded

County-funded projects for Loudoun small businesses: an AI opportunity-scout agent that screens contract notices for a government contractor, an AI operations review and workflow build for a print shop, website and AI-search foundations for a fraud-prevention consultancy, and a brand kit for a wellness business.

Brambleton Community Association · Large Loudoun community association

Direct engagement

HOAgent, a governance assistant that answers staff questions from covenants, bylaws and policies with citations for staff review. AI-assisted video production that turned routine notices (snow safety, a road closure, an app launch) into short videos that drew positive resident feedback.

LIFT-VA and Athari BioSciences · Workforce partnership

Employer and industry partner

Connecting applied AI with Virginia's life sciences workforce through instructor sessions and work-based learning.

COMMERCIAL & LIFE SCIENCES

ColoWatch · Digital health and preventive screening

Prime contract

Built and runs Content Studio, an AI media tool that drafts articles in ColoWatch's voice, adds citations from curated medical sources, creates images, publishes to the website and schedules posts across five social channels, with clinical review before anything goes live. Also relaunched the website and is adding an AI-assisted CRM, leadership AI enablement and AI-answer visibility.

Theiagen Genomics · Public-health bioinformatics

Prime contract

Executive dashboard with knowledge chat, a governed company knowledge layer, quote-to-cash and SOW generator, staff AI training, and website and marketing operations.

KC Enterprise Auto · Nationwide vehicle and equipment salvage

Prime contract

Airtable-backed bid intake, client and employee portals, three websites, a Google Workspace migration and IT support.

Also: marketing, IT and launch support for a consumer product company; applied AI working sessions for a family-run tree service; websites with search and AI-answer foundations for local businesses.

"Complex marketing tasks were completed in hours. Without AI, these would have taken days by a team of at least a few programmers and designers."

Mark E. Klein, MD, Co-Founder and President, ColoWatch

"The solutions his team delivered fit naturally into how our staff already works, and residents have responded well."

Rick Stone, General Manager, Brambleton Community Association

"[Galang AI] listens carefully, moves quickly, and consistently turns our business needs into practical solutions."

Carter Roe, Vice President, KC Enterprise

HOW WE RUN GALANG ON AI

Each of our 13 active client accounts has its own versioned knowledge base that our agents read before they act. Agents draft, build, test and deploy. A person approves anything that leaves the company, spends money or changes access. Code, hosting and access control run on infrastructure we operate, so private and self-hosted deployments are standard for us.

TEAMING

We sub as the AI architecture, engineering and governance partner, or deliver under a partner's brand. Top Secret cleared key personnel. Our WOSB, EDWOSB and SWaM status counts toward a prime's small-business goals. References on request.
