ABOUT GALANG AI

Galang AI is a Virginia-based, women-owned small business that designs and deploys responsible, mission-grade AI systems for government and commercial clients. Founded by Ara and James Galang, we bring a rare combination of executive-level operational leadership and hands-on technical expertise across AI automation, enterprise systems, and regulated environments.

Our approach is operator-led: we embed forward-deployed AI specialists directly into client environments to learn existing systems, workflows, and pain points before building anything. Every solution integrates with the tools teams already use, requiring no new platforms and no change management. From intelligent document processing and RAG-powered knowledge systems at the IRS and CMS, to classified AI initiatives for the Department of Defense, our work is production-grade, policy-aware, and built to scale.

We specialize in custom AI agents, process automation, private LLM deployments, and governance-compliant systems designed for organizations that need speed without sacrificing security, auditability, or human oversight.

CORE COMPETENCIES

- AI Strategy & Enablement
- AI Agents & Orchestration
- Intelligent Process Automation
- Managed AI Operations
- Production-Grade Media Generation
- Human-in-the-Loop Systems
- AI-Driven Digital Media Systems
- RAG & Knowledge Systems
- Enterprise AI Integration
- Governance & Compliance (NIST)
- Private LLM Deployments
- Multi-Agent Orchestration

DIFFERENTIATORS

1. Operator-Led Methodology

We don't just consult—we embed expert operators (holding Top Secret clearances) directly into client environments to learn systems firsthand before building solutions. Every solution integrates with existing tools, requiring no new platforms to learn.

2. Production-Grade AI at Speed

Complex marketing tasks completed in hours that would take teams of programmers days. We deliver exceptional quality at the speed of AI.

3. Responsible AI by Design

Policy-aware systems with audit trails, guardrails, human-in-the-loop protocols, and full governance for regulated environments. NIST compliance, PII protection, and transparent explainability built in.

PAST PERFORMANCE

W-2 Internal Revenue Service (IRS) | 2024 - Current

Via Sky Solutions LLC. Multiple RAG Agents and ETL embedding systems for tax document processing and analysis. ACTIVE.

W-2 Centers for Medicare & Medicaid Services (CMS) | 2024 - Current

Via Sky Solutions LLC. AI Analysis System for Policymakers—intelligent document analysis and policy recommendation engine. ACTIVE.

SUBCONTRACT Department of Defense (DoD) | 2025 - Current

Classified. IN PROGRESS.
